

4Life Transfer Factor[®] Belle Vie[™] 4Life

NUTRIENTS FOR A HEALTHY AND BEAUTIFUL LIFE

Cellular Health Support for Women

You are a woman. And you're living a great life. Now is your time to take action; and do everything possible to take care of yourself and support your body's health, so that the best years of your life will remain ahead of you.

Every day more information is made available regarding women's health. Breast and gynecologic health are two issues that stand out, affecting every woman's life in some way.

Vida hermosa, bonita vida, belle vie—no matter what language you use, 4Life Transfer Factor Belle Vie is a product designed to support a long and healthy, **beautiful life** for women around the world. Scientifically formulated to promote cellular health in women, 4Life Transfer Factor Belle Vie offers targeted support that goes beyond the ordinary. It combines immune-enhancing Targeted Transfer Factor with a blend of herbal antioxidants, phytoestrogens, indoles and Calcium d-Glucarate to support gynecologic system and breast health by assisting the body in the healthy elimination of toxins. Belle Vie provides a powerful natural approach that reinforces your proactive strategy for health and longevity.

Key Points

- **Targeted Transfer Factor:** Transfer factors are tiny messenger molecules that provide highly advanced immune system support. They work by transferring immunity information from one entity to another, such as between a mother and her breastfeeding infant.

4Life Transfer Factor Belle Vie focuses the immune-boosting benefits of transfer factors to provide targeted health support to the breasts and gynecologic system of the body. It offers advanced support to help strengthen the body's natural immune response and promote healthy cell growth and function. Belle Vie is formulated with 4Life's exclusive Targeted Transfer Factor, a synergistic blend of transfer factors from both cow colostrum and egg yolk sources, for the most advanced transfer factor immune support available today.

- **Phytoestrogen Support:** Phytoestrogens, or plant estrogens, are trace substances found in food, which mimic and supplement actions of the hormone estrogen. They are known to have antioxidant effects, support normal inflammation levels, and bind with estrogen receptors in the body. Phytoestrogens in the diet offer a stabilizing factor that may promote long-term reproductive health.

Ensuring uncompromised support, Belle Vie is formulated with lignans and isoflavones from Kudzu and Red Clover, all powerful phytoestrogens. This healthful combination supports breast and reproductive system health by binding circulating estrogens and other substances. Higher levels of lignan phytoestrogens in the diet have also been linked to greater support of women's overall health.

- **Indole Support:** Plant compounds called Indoles, which are found in many cruciferous foods, have been shown to help support female cellular health by promoting normal cell growth and providing detoxifying benefits. They also trigger enzymes in the body to inhibit damaging estrogen action and promote breast health. Scientific studies show that increased consumption of cruciferous vegetables, including broccoli, cauliflower, cabbage and Brussel sprouts, is related to greater support of women's overall health.

Additional detoxifying support is provided by Calcium d-Glucarate, a natural substance that nutritionally supports your body's ability to eliminate toxins and other potentially harmful elements. It works by blocking an enzyme that allows potentially damaging chemicals to remain in your body.

- **Antioxidant Support:** Exclusive Belle Vie also contains a specialized combination of herbal antioxidants, including Green Tea and Grapeseed extract for added protection against naturally-occurring free-radicals in the body that are known to cause cellular damage. The health benefits of green tea also extend to provide support for normal cell growth in the body.

Technical Points

- The extraction processes for transfer factors from colostrum and egg sources are protected by US patent 4,816,563, 6,468,534, and 6,866,868.
- The gynecologic system includes the uterus, endometrium, ovaries, cervix, vulva, and vagina.

DIRECTIONS: Take two (2) capsules daily with 8 oz of fluid.

Supplement Facts

Serving Size: One (1) Capsule
Servings Per Container: 60

Amount Per Serving		%DV
Targeted Transfer Factor[®]	50 mg	*
A patented extract containing Targeted Transfer Factor from cow colostrum and egg yolk		
Phytoestrogen Proprietary Blend	138 mg	*
Kudzu Isoflavone Extract
